

**AWARD**  
**Electronic Document Management**  
**APPLICATION OF THE YEAR**  
**DOCUMENT MANAGEMENT**  
**NORBERTO ODEBRECHT BUILDING COMPANY**

An EDM (electronic document management) system manages the legal documents pertaining to litigations as well as jurisprudential documents, providing swiftness and easy operations to ensure the alignment of the various departments of the company, thus generating a flow of managerial information. The system encompasses the elaboration of a table comprising timelines, indexing as well as research functionalities with a dynamic taxonomical scheme – whose classification items are updated automatically by the managers of the system – access, research and viewing via web portal, as well as the interaction of this tool with e-mail. Contents are stored and made available in several different formats, being operated in a user-friendly environment and with guaranteed safety coupled with remote access.

**The supplier of this solution was LAB245**

The award was received by Míria de Cássia Tavares Karagulian, Information Analyst at Norberto Odebrecht Building Company.
